Hosted phone systems save money while delivering premium features.

The Engage Plan from Skybox Innovations is the ultimate business tech package. We've got your communication, security, business apps, phones, and tech support covered. You'll get more than you had before for less. It's pointless to pay expensive IT bills for things you don't understand and don't know how to use. We like to be transparent, so we're laying out exactly what you get, and how little it's going to cost you.

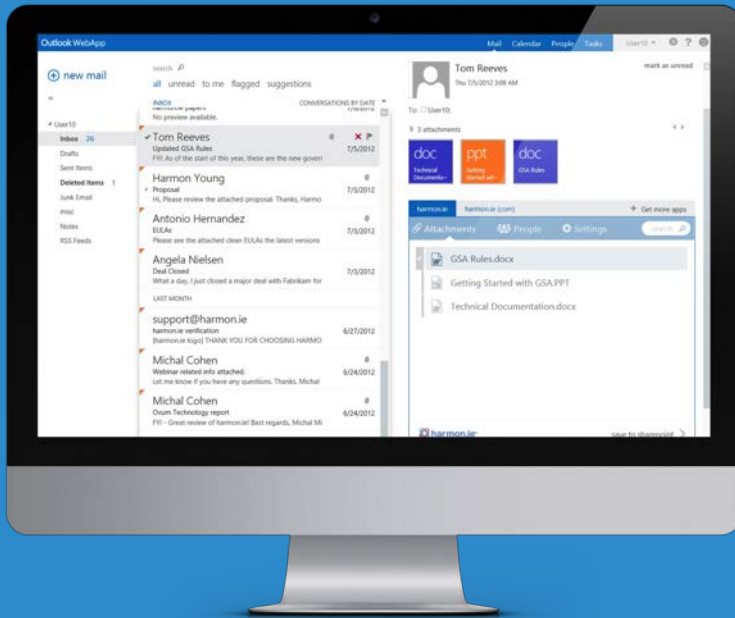

Office 365

Word, Excel, PowerPoint, Publisher, and OneNote. Online and offline.

Hosted Exchange

Exchange 2013 – email, calendars, contacts, and much more

◆ Secure and professional email with business features

◆ Access from all devices

Share what matters Video and application sharing available in every interaction

IT

Rest easy Knowing that enterprise policies and standards are maintained

Reduce costs Simplified management through a single platform

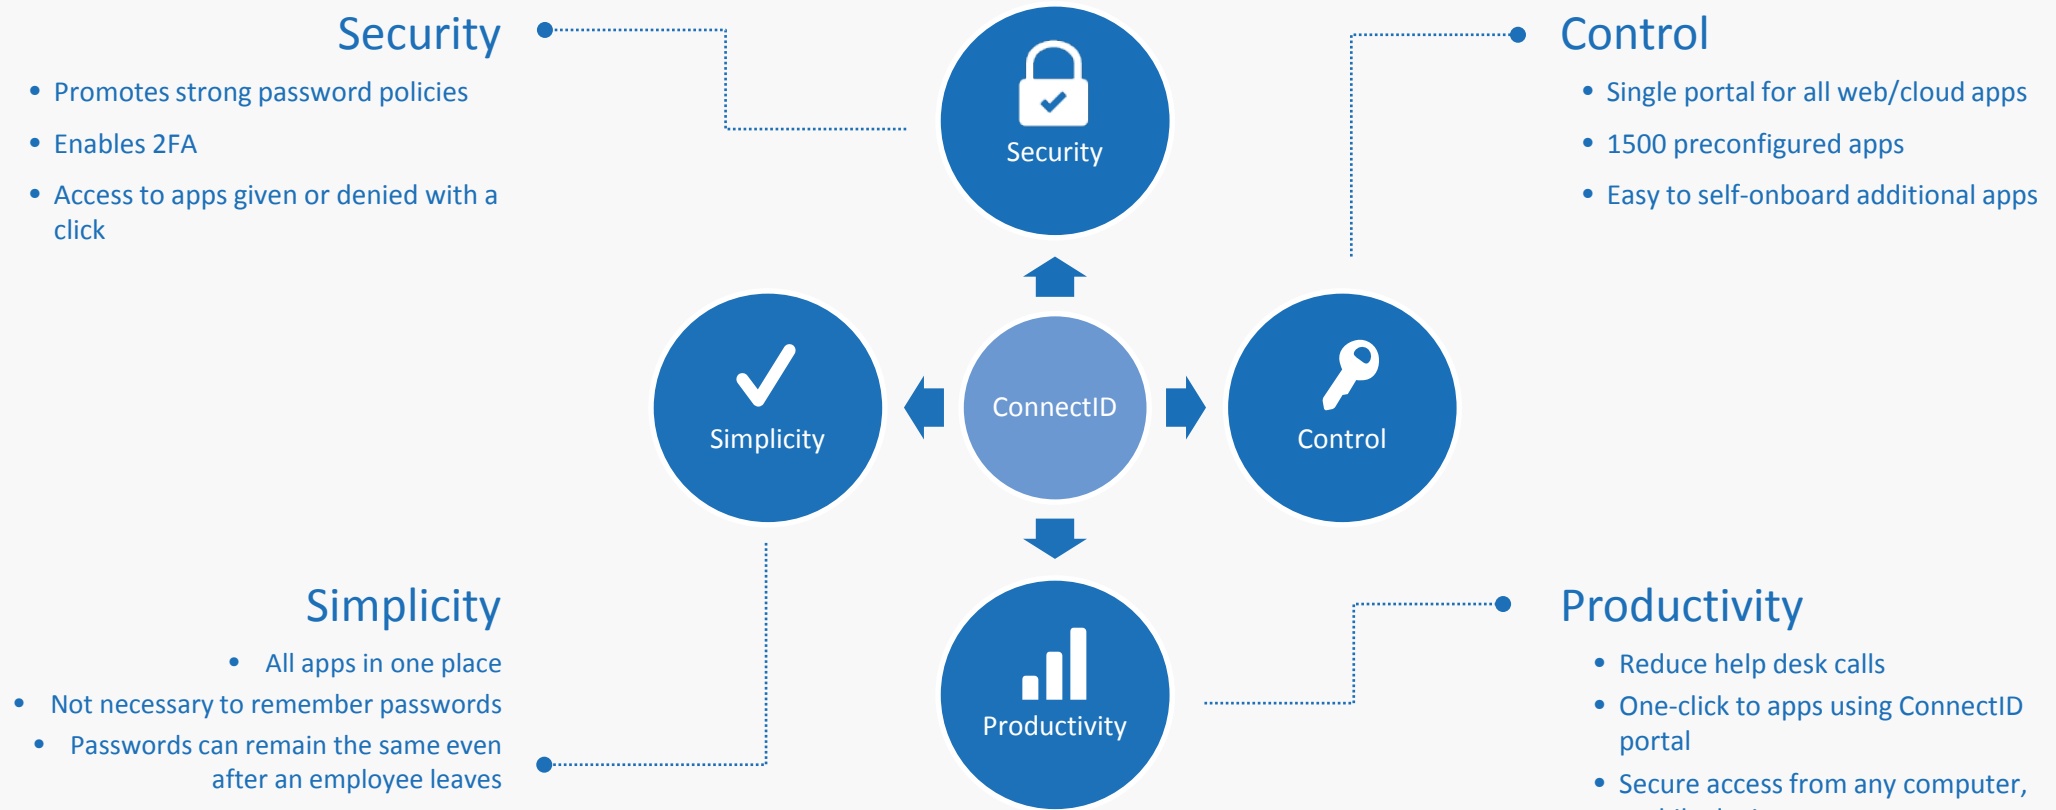

Lync is the best option for communicating within businesses. Know what coworkers are doing; see their availability; message them; and share screens with them. Lync is the ultimate messaging, meeting, and communication tool for businesses, whether you have five employees or five hundred.

ConnectID

Password protection and app management

Domain Name Hosting

Company email and website personalization

Why is domain name hosting with us important?

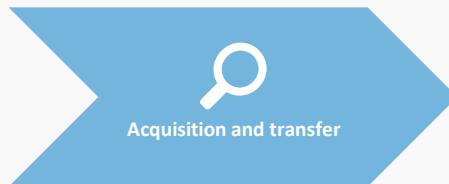

Branding

An email and website personalized towards a company name is essential to good marketing, and obtaining or securing a domain name before someone else takes it is important. It will further branding and make it easy for customers to find the website and contact the company.

Professionalism

A company with an email address ending in gmail.com or another email provider will lose customers, because they will believe the business lacks professionalism and may not be a serious business at all.

Acquisition and Transfer

We will acquire a requested domain name for you and manage it. If you already have a domain name, we will help you transfer it to us. This process can be cumbersome if you haven't done it before. Let us do it for you.

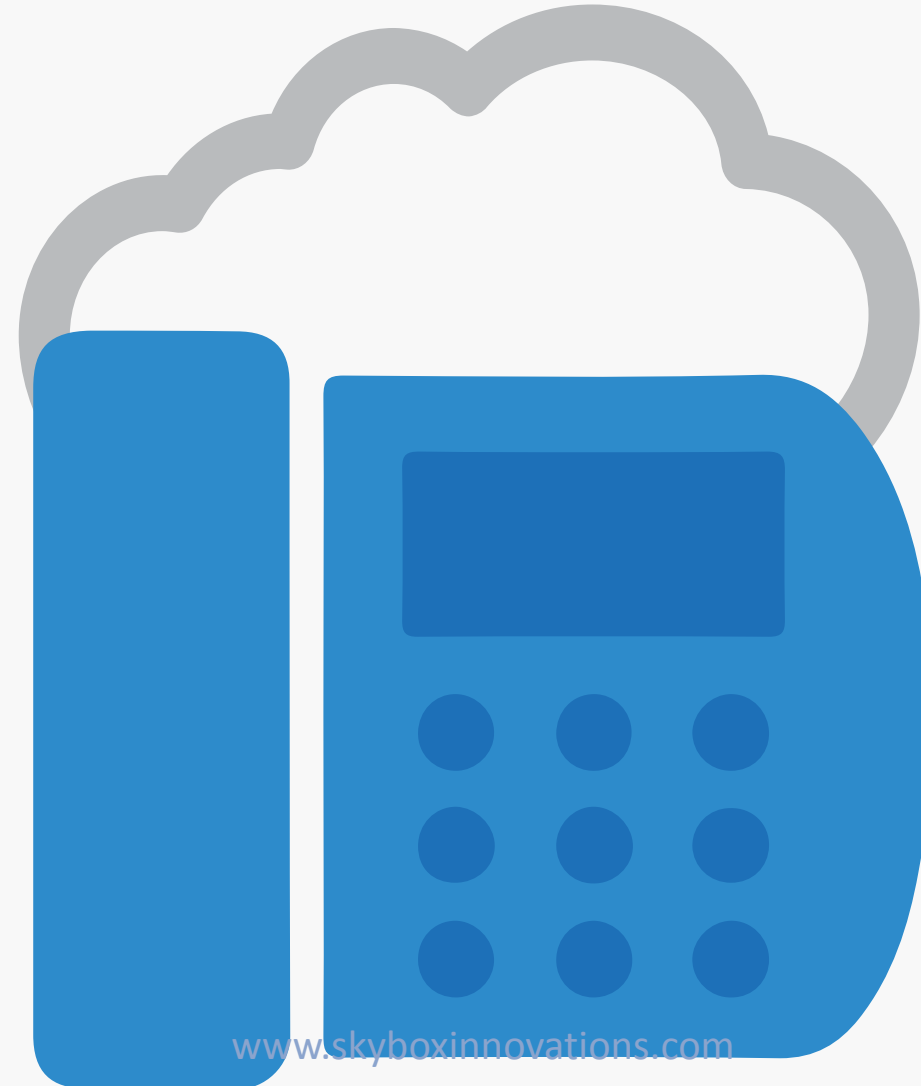

Simplicity

Having all of your business solutions with one company means that you'll only need to contact one company to get answers regarding those solutions. Build a relationship with our technical support team instead of navigating a new company with every question you have.

Hosted PBX Voice Services

Business phones in the cloud

Streamline

Get all cloud services from one provider

Communicate Better

Rich features, conferencing & mobility

Simplify

Powerful, intuitive web-based Control Panel. Add users and manage features with a few clicks.

Advantages of Our Voice Services

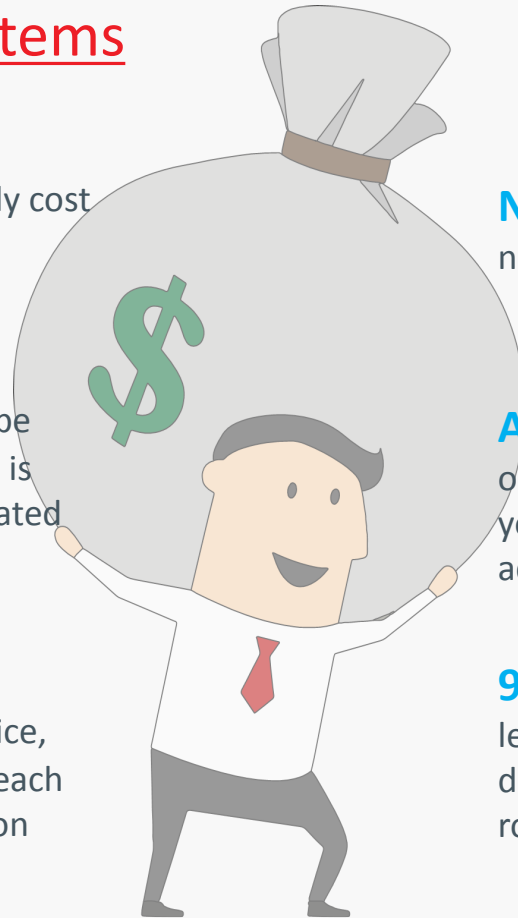

Save money, time, and frustration

Expenses of On Premise Phone Systems

Maintenance Contracts. Yearly contracts that typically cost 10% of initial phone system

Expanding Phone System. Additional phones must be purchased and usually a piece of hardware called a line card is required. Each time a new phone is added, there is complicated hardware installation

Downtime Costs. When the power goes out at the office, phones will no longer work. Customers will not be able to reach you, and you can lose both revenue and customer satisfaction

Our Voice Services in the Cloud

No Maintenance Contract. There's no catch to this. If you need support, just call us. Our techs will be happy to help

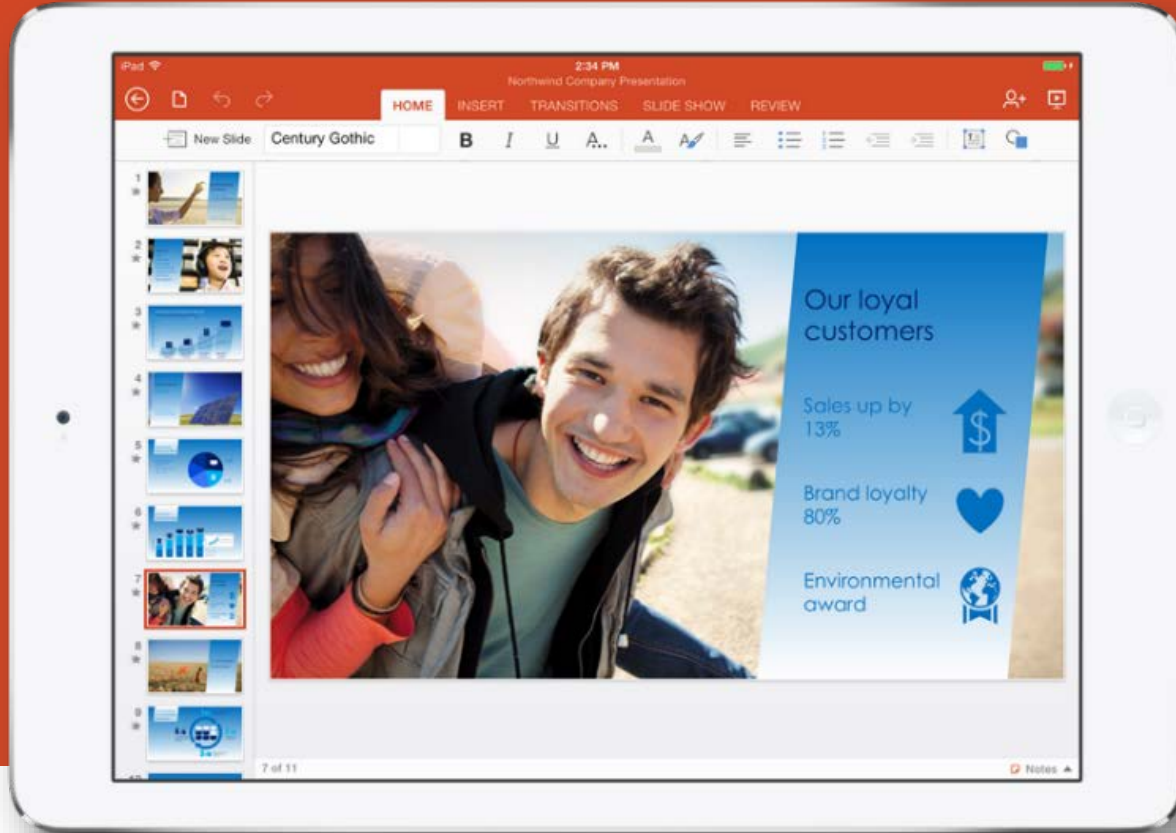

Add Phones at No Cost. When you need to add a phone, call or email us. We have several free, business-grade phone options for you. They're great. We use them ourselves. And, there is no additional hardware to purchase. Scaling is simple and exciting!

99.999% Uptime SLA. What? We guarantee that there will be less than 26 seconds of downtime in a month. What about natural disasters? If the power goes out, your phones can automatically route to voicemail or forward to mobile phones.

Office 365

Office wherever and whenever

Word

Create documents with style and polish, work with others easily

OneNote

All your notes together and with you anywhere.

PowerPoint

Easily work with others and design beautiful presentations

Publisher

Use simple tools to create and share publications that make an impact.

Excel

Excel gives you intuitive ways to explore your data

Access Anywhere

Work online or offline. From computers, tablets, and phones.

Be always up to date: With Office connected to the cloud, you always have the latest version of the desktop applications, with unobtrusive updates.

Use on 5 PCs and Macs: Each user can use the Office desktop applications on 5 Windows PCs or Macintosh computers, at work or at home.

Use Office on your smartphone and tablet: Access your documents and make edits on the go with Office apps for iPad, Windows Phone, iPhone and Android phones.

Anywhere access to documents: Save your Office files to ShareSync and they will be linked to you virtually anywhere you go and editable. No more heading back to the office to get a file or document.

Email

Exchange equips businesses with the #1 email solution
