Domain Name Hosting

Company email and website personalization

Why is domain name hosting with us important?

Branding

An email and website personalized towards a company name is essential, and obtaining or securing a domain name before someone else takes it is important.

Professionalism

Email addresses ending in gmail.com or another email provider are not professional.

Acquisition and Transfer

We will acquire a requested domain name for you and manage it. If you already have a domain name, we will help you transfer it to us. This process can be cumbersome if you haven't done it before. Let us do it for you.

Simplicity

Having all of your business solutions with one company means that you'll only need to contact one company to get answers regarding those solutions. Build a relationship with our technical support team instead of navigating a new company with every question.

Collaborate Plan

Understand your business tech and don't overpay.

File Sharing
